The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply					
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).					
Status					
1) Responsive to communication(s) filed on 12 M	arch 2007.

DETAILED ACTION

Election/Restrictions

1. Claim 24 has been withdrawn from consideration as being directed to a non-elected invention as indicated in the Office Action mailed 11/7/2006. See 37 CFR 1.142(b) and MPEP § 821.03.

Claim Rejections - 35 USC § 103

- 2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

The factual inquiries set forth in *Graham* v. *John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

- 1. Determining the scope and contents of the prior art.
- 2. Ascertaining the differences between the prior art and the claims at issue.
- 3. Resolving the level of ordinary skill in the pertinent art.
- 4. Considering objective evidence present in the application indicating obviousness or nonobviousness.
- 3. Claims 9-15,19 and 23 are rejected under 35 U.S.C. 103(a) as being unpatentable over Moratalla (U.S. Patent Number 6,361,588) in view of Guimaraces (U.S. Patent Number 6,044,640) and Shinkai (JP 57150789).

In regard to claims 9,12,14 and 23, Moratalla discloses an energy transfer system as shown in Fig.5H. The system comprises desiccant dehumidifier, heater 16, sensible heat exchanger with tow passages and evaporative cooling 117. Moratalla discloses the invention

Application/Control Number: 10/686,711

Art Unit: 3744

Page 3

substantially as claimed. However, Moratalla does not disclose rotor type dehumidifier and is silent about the evaporative cooling detail. The water is supplied to the passage through the evaporative cooling device. Fig.5K indicates the moisture content in the air stream has been increased. Figs.5A-5F present the air from a second passage is discharged into the atmosphere. Guimaraces discloses rotor type dehumidifier in the same field of endeavor for the purpose of having desiccant wheel and Shinkai discloses water spray evaporative cooling device. Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention was made to provide the apparatus of Moratalla with a rotor dehumidifier in view of Guimaraces and with a spray evaporative cooling in view of Shinkai so as to use wheel desiccant and prior art spray evaporative cooling device. In this case, the desiccant dehumidifier of Moratalla and Guimaraces are commercial available dehumidifier and the change of equivalent parts are obvious to one having ordinary skill in the art.

In regard to claim 10, Moratalla discloses stationary sensible heat exchanger.

In regard to claim 11, Guimaraces discloses using combustion turbine exhaust heat.

In regard to claims 13 and 19, the nozzle spray is well known in the prior art and the passages of the heat exchange element are isolated since it is indirect heat exchanger.

In regard to claim 15, Guimaraces discloses honeycomb desiccant wheel (Fig.3) and the honeycomb has sound absorption property in nature.

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Chen-Wen Jiang whose telephone number is (571) 272-4809. The examiner can normally be reached on Monday-Thursday from 8:00 to 6:30.

Application/Control Number: 10/686,711 Page 4
